Industry Data									

^a Geomean of most sensitive species used if EC₁₀ or NOEC values were within one (1) order of magnitude; otherwise, lowest value used preferentially

^b Indicates reported value is a NOEC due to lack of dose-response observed in the study

^c Indicates value is a NOEC; unknown if dose-response was observed in the study

^d Reported value is a 24-hour EC₁₀ due to significant decreases observed in measured test concentrations at 48- and 72-hours

^e *Anabaena flos-aquae* less sensitive in rangefinder study (*Anabaena flos-aquae* EC₅₀ > 500 µg/L)

^f EC₁₀ value used preferentially instead of NOEC to calculate PNEC_{ENV}

^g 24-hour study

^h 48-hour study

ⁱ 96-hour study

^j fluconazole removed from list as not an antibiotics

^k Three repeat studies indicate value is an outlier; removed from PNEC derivation
